

## ACCESSORIES

# RACK MOUNTING KIT

## DESCRIPTION

ICS Minibox™ Rack Mounting Kits are designed to mount ICS's Minibox Interfaces in a standard 19 inch wide rack. The same kit also fits into the European DIN standard racks.

Each Rack Mounting Kit is designed to hold one or two modules. The modules are mounted from the rear and slide through openings in the front of the kit frame. The modules are held in place with a 'U' shaped retaining bracket that bolts to the kit frame. The assembled frame and modules is then bolted to the rack rails with four #10 screws.

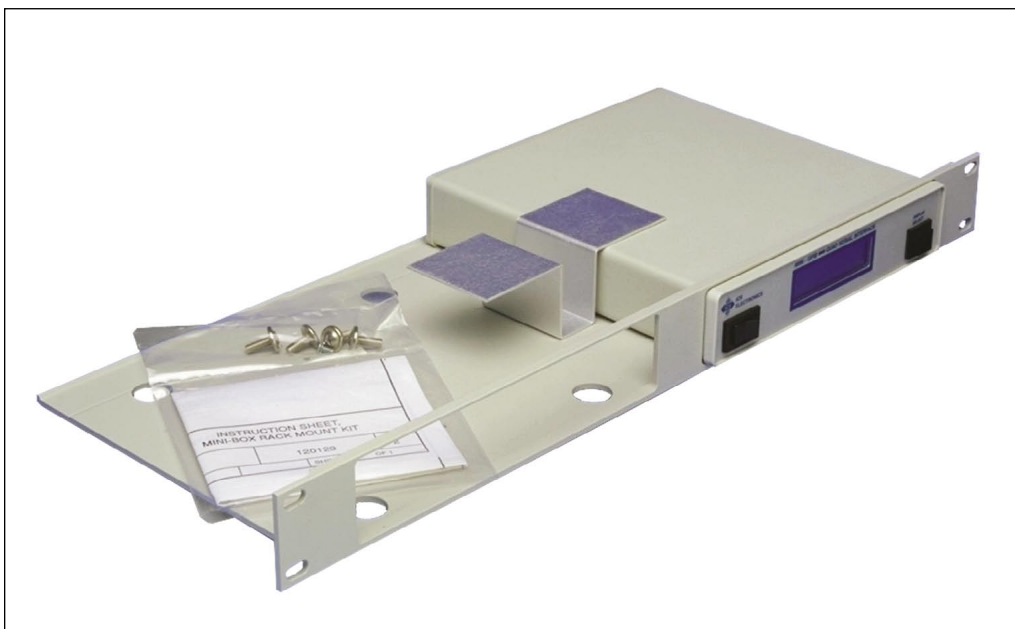

The Rack Mounting Kits are painted light gray to match the minibox cases. Each kit includes the retaining bracket and all necessary mounting hardware.

There are five Minibox Rack Mounting Kits to choose from depending upon the combination of modules that the user wants to rack mount. The choices are:

1. A single small minibox
2. Two small miniboxes
3. A single large minibox
4. Two large miniboxes
5. One large and one small minibox.

- Rack mounting kits for all Minibox™ interfaces.  
*A configuration for every combination.*
- Low profile design.  
*Uses only 1 U of rack height. (1.75 inches)*
- Fits standard racks  
*Easy rack installation*
- Kits hold one or two ICS Minibox™ interfaces.  
*More units in less space.*
- Simple assembly with retaining bracket.  
*Easy assembly and disassembly.*

 *RoHS Compliant*

**Minibox Rack Mounting Kit - Version shown is for two large miniboxes**
